

Mark Joggerst - Silence – 01.09.2006

Silence

After his Gold Award 2005 Mark Joggerst presents a new Album under his own name again. On his new work "Silence" he takes us on a musical journey. Between peaks of though-composed euphoric sound cascades we dive into the wide space of an internalized world of sound. Piano improvisations of deeply felt melancholic beauty and wide landscapes of sounds take us in a world where silence starts to be audible. Completely in the tradition of a film soundtrack on this album Mark Joggerst uses only two themes which are orchestrated and arranged again and again in different ways. This creates a musical unity that carries the listener from one piece to the other.
